

RISK CONTROL

for energy & chemicals

pilko

Gain or regain control of operational and EHS risk, growing business, asset, financial, and reputational value.

Risk control for energy and chemical leaders.

Asset operational and EHS risk is everywhere. Leaders are under pressure to make the right decision, acquisition or divestiture, and to invest in the right areas is increasingly difficult. Cut through the mystery, get control.

Pilko & Associates is an industry leading operational and environmental, health, and safety risk advisory firm—in over 50 countries and \$600 billion in M&A deal value.

World-class, proven solutions, experience, best practices, people, and relationships that bring you the information, insight, and process you need to control decision and investment risk.

CONTROL CONFIDENCE

GET CONTROL OF RISK. TODAY.

Complexity often leads to unforeseen risk, increased expense, and potentially large loss.

Energy and chemical leaders understand that identifying, validating, and managing complex risk—getting control—is key to operational, EHS, and M&A success.

WRONG DECISIONS ARE COSTLY.

Where to apply scarce resources for the greatest benefit requires insight, discipline, and experience. It's important to have the right strategic advisors that consistently deliver the best operational and M&A process, best practices, methods, and skill.

Energy and chemicals leaders rely on Pilko & Associates to gain or regain control of their risk.

CONTROL RISK BY FUTUREPROOFING ASSET OPERATIONS & EHS.

Leverage past decision and investment risk. Have confidence in managing today's business risks. Ensure that future asset operations and EHS risk is controlled. It's that simple with Pilko.

ARE YOU SURE?

When it comes to operational and EHS risk, are you sure you have the right information, insight, skill, process, methodology, and experience?

You can be sure with Pilko & Associates.

ABOUT PILKO & ASSOCIATES

Pilko & Associates provides industry-focused advisory services in three core areas—Transactions, Operational Excellence and Governance & Assurance—to enhance value for our clients and their stakeholders in the chemical and energy sectors. We deliver innovative solutions for publicly and privately-held companies, helping them to identify, understand and manage their Operational Risk and Environmental, Health & Safety needs.
